

Medical Scribe Services

Helping you focus directly on your patients, while increasing reimbursements and improving your quality of life

About Medical Scribe Services

Medical scribes perform Electronic Health Record (EHR) documentation at the point of care to help physicians focus more on patient care, and less on administrative duties.

Benefits to Community Connect® physicians and practices:

1. Ability to see more patients
2. Accurate, real-time documentation and coding
3. Improved job satisfaction and quality of life

John Muir Health's partnership with ScribeAmerica® offers dedicated medical scribes to your Community Connect practice.

- ScribeAmerica is the nation's most widely used medical scribe company
- All scribes have vast experience in primary care and over 60 medical and surgical sub-specialties

Medical Scribe Services

Testimonials

"Using a scribe saves time. The physician never has to do after-hours dictation in the office or bring charts home to dictate. The chart is completed when the physician leaves the examination room."

— G. Klaud Miller, M.D., American Academy of Orthopedic Surgeons

"I can focus on patients much better and see more of them in a day with LESS STRESS, which allows for increased accessibility. I would recommend the scribe as much from a quality perspective as for a productivity perspective."

— Larry Hicks, M.D., Family Medicine, John Muir Health

"This allows me to truly have days off and recharge every weekend so that I am fresh for the next week of patient care. I am more efficient in clinic. I tend to run more on time and I am more able to accommodate same day visits and overbooks."

— Lisa Rood, M.D., Pediatrics, John Muir Health

"Having Monica in the room with me has allowed me to Listen, Think and Care better for my patients while the inane functions of ordering tests, diagnosis/test associations and documentation are left to her flying fingers."

— Smrutirekha Misra, M.D., Internal Medicine, John Muir Health
